

Knot

4x4 sequential switch - 30HP

A tangle of connections, endlessly reconfigurable. Knot lets you reroute any of 4 inputs to 4 outputs using 12 control inputs or one of 128 pre-programmed patterns. A visual map shows the signal flow in real time, making complex modulation not just powerful, but intuitive.

Panel

- | | | |
|---------------------|----------------|------------------------|
| A. Swap inputs | E. Reset input | I. Pattern select knob |
| B. Shift inputs | F. Inputs 1-4 | J. Pattern no. screen |
| C. Random input | G. Outputs 1-4 | K. Pattern reset Input |
| D. Redo/Undo inputs | H. Map screen | L. Pattern step input |
